

GOALS

Short-term Goals (0-2 years):

Establishing a network of businesses and start-ups dedicated to creating technology and solutions that are sustainable.

Holding seminars and workshops to teach incubator participants about the value of sustainability and how to incorporate it into their company plans.

Forming alliances with regional green companies, non-governmental organizations, and government agencies to advance a cooperative approach to sustainability.

Mid-term Goals (2-5 years):

Helping new businesses obtain capital and investments for the creation and expansion of their environmentally friendly goods and services.

Increasing the number of mentoring programmes with a sustainability focus and giving entrepreneurs access to professionals and industry experts that have knowledge of sustainable business practises.

Monitoring and measuring the start-ups environmental effect while in the incubator and pushing them to use sustainable business practises.

Long-term Goals (5+ years):

Establishing a flourishing network of environmentally and socially conscious start-ups that are sustainable.

Gaining a reputation as a premier hub for sustainable innovation, Deep Tech, Med Tech, Smart Industry, and Advanced Manufacturing. Financiers eager to fund ecologically sensitive companies.

Collaborating with foreign institutions and organisations to increase the incubator's sustainable projects impact and reach on a bigger scale, maybe even internationally.
